

HG natural stone cleaner extra strong (product 40)

- removes stubborn dirt and grease

HG natural stone cleaner extra strong has been specially developed for the fast and easy removal of grease and ingrained dirt from marble and other types of calciferous natural stone such as travertine, solnhofen limestone, blue stone, granite, terrazzo, etc. It is also suitable for the removal of polish and other protective films, such as *HG natural stone protector (product 33)*.

Directions:

For normal powerful cleaning:

Dissolve half a litre in half a bucket (5L) of lukewarm water and apply generously with a floor cloth or mop. Leave to work for a few minutes. If necessary scrub the surface well with a scrubbing brush or stiff broom. Then remove the solution from the surface with a floor cloth or mop, regularly rinsing and wringing it out in water. (A water extractor can be used if required.) After that, thoroughly mop the floor again 2 times with clean water. Repeat the treatment if necessary.

To remove stubborn dirt or old polish and other protective films:

Use this product undiluted. Follow the steps described above.

Coverage:

- ± 10-15 m² per undiluted litre.
- ± 25-50 m² per litre diluted.
