### HG natural stone worktop cleaner

- cleans without streaks and is completely safe
- for daily cleaning

*HG natural stone worktop cleaner* has been especially developed for the fast and safe daily cleaning of natural stone kitchen worktops. This product effectively removes fat and other grime and leaves a streak-free result, without rubbing. This special formula also enhances the texture so that your kitchen worktop's 'natural' properties are as good as new every day.

**Directions for use:** Turn the nozzle on the front side a quarter. Spray the surface to be cleaned with *HG natural stone worktop cleaner* and wipe the surface with a clean cloth (can be dampened). For stubborn, dried-in grime leave the product to penetrate for a few minutes (if necessary, use an *HG kitchen sponge* to loosen the grime). For extra gloss, we recommended polishing the treated surface with a dry cloth or tea towel afterwards. Turn the nozzle a quarter after use (OFF).

**TIP:** This product is also suitable for concrete worktops. To protect your kitchen worktop against the penetration of fat, grime and stains we recommend the application of *HG natural stone worktop protector*.

**Attention:** Transport and store the bottle upright. Do not spray directly onto foods. Do not use scouring agents on your kitchen worktop as that could leave mat and tarnished areas.
