oven, grill and barbecue cleaner

removes burnt-in and caked-on grease

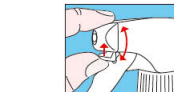

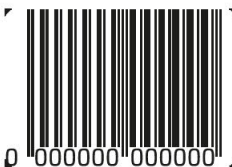

500 ml e

Oven, grill and barbecue cleaner

- removes burnt-in and caked-on grease
- also ideal for stainless-steel hobs

Lifts off dried and baked-on grease from ovens, grills, gas and other barbecues, stainless steel hobs and hot plate grill. Also extremely suitable for removing discolourations from stainless steel hobs.

Directions for use: Press the nozzle at the front side and turn a quarter. If you have used the bottle before, remnants of the liquid may be left in the nozzle, causing it to work less well when you reuse the bottle. Before reusing the bottle, we recommend you rinse the nozzle with hot tap water, e.g. by running the water through the air holes at the side of the foam pipe. Spray *HG oven, grill and barbecue cleaner* on the surface to be cleaned. If you treat stainless-steel parts, treat them as a whole to prevent colour differences. Leave for 3-5 minutes to work before wiping off with a damp sponge. After wiping away all of the grease, rinse several times with hot water. Repeat the application 2 or 3 times on heavily marked barbecue grills and hot plates. Turn the nozzle a quarter backwards after use (blocking position). For the best results, warm up the oven until the bottom is lukewarm. Before use check the surface temperature of the appliance which should not exceed 30°C. Thereafter use on appliance surface as directed.

2305

Attention: Transport and store the bottle upright. Do not use on untreated aluminium. ~~For use on the outside~~ of the oven, grill or barbecue. Consult your instruction manual before use. Prevent any liquid from running out on, for example, worktops. Should this happen clean it immediately with plenty of water. For (comb-) microwave ovens use *HG microwave cleaner*. Use of *HG oven, grill and barbecue cleaner* in combination with a high temperature could cause damage to the surface of the appliance.
